# Muhammad Haziq

Sr. Software Engineer at Nextbridge | React.js | Redux.js | Next.js | vue.js | vuex.js | Node.js | Express.js | Nest.js | mongodb | Fintech | MERN

Lahore District, Punjab, Pakistan

## Summary

I am a seasoned Full-Stack JavaScript Developer with 7 years of hands-on experience, specializing in building robust and cutting-edge web applications. My passion lies in creating seamless user experiences and staying up-to-date with the latest technologies. I am proficient in the entire JavaScript/Typescript ecosystem, including front-end frameworks like React.js, Redux.js, Vuxes.js Next.js and Vue.js, and back-end technologies like Node.js, Nest.js, and Express.js. I excel at managing states in complex applications using Redux.js and Vuxes.js and have a strong background in unit testing with JEST, Chai, and Mocha.

Database management is another area of expertise for me, with proficiency in both MySQL and NoSQL databases, enabling me to design efficient data structures and seamless data interactions. Additionally, my versatility as a Full-Stack Developer extends to PHP, AJAX, and JSON, allowing me to create dynamic and interactive user interfaces.

As a developer, I prioritize clean and maintainable code, striving to ensure efficient collaboration through version control using Git.

As a leader, I have experience as a Lead Developer for the FinanceThat product, where I successfully led and contributed to projects while fostering effective communication and collaboration. My notable accomplishment includes developing successful E-Commerce apps and showcasing my ability to deliver scalable, customer-centric solutions.

I am committed to continuous learning and staying updated with emerging trends and technologies, such as exploring tools like Next.js for more powerful and efficient applications. My ultimate goal is to contribute my expertise and passion to impactful projects

that push the boundaries of web development and bring meaningful solutions to the digital landscape.

#### Skills:

Typescript, Nest.js, Javascript, React.js, Redux.js, Next.js, Nuxt.js, Vue.js, Vuxes.js, Node.js, Express.js, MongoDB, MariaDB, MySQL, Git, Chai, Mocha, Jest

---

## Experience

### InsuranceMarket.ae™

#### Senior Software Engineer

June 2023 - Present (1 year 8 months)

Dubai, Dubai, United Arab Emirates

Working with TypeScript and Sequelize ORM with MySQL, currently I am working on fintech modules. I write Postman test cases and integrate payment gateways, including Apple Pay, checkout, TAP in an insurance project. I also develop cron jobs to fetch data from third-party APIs. As a senior developer, I focus on code refactoring and optimization to enhance application performance.

### Nextbridge Ltd.

#### Sr FullStack Developer

October 2021 - Present (3 years 4 months)

Lahore, Punjab, Pakistan

I am a Senior Software Engineer with at Nextbridge, specializing in various technologies related to web development. I am proficient in server-side technologies such as Node.js, Express.js, and Nest.js, as well as front-end frameworks like React.js and Angular CLI. I have expertise in managing states using Redux.js and am skilled in both TypeScript and JavaScript. Version control using Git is an essential part of my workflow.

Additionally, I have experience working with databases like MongoDB and MariaDB, and I am wellversed in using Sass and Tailwind CSS for efficient styling and design implementation.

Over the course of my career, I have honed my skills in building robust and cutting-edge web applications, and I am committed to staying updated with the latest trends and technologies in the

industry. My goal is to continue contributing my expertise to meaningful projects that drive innovation in the web development landscape.

## Ecologix Pakistan

### Sr Software Engineer

October 2018 - September 2021 (3 years)

Lahore, Punjab, Pakistan

As a Senior Software Engineer with 3 years of experience at Ecologix, I possess a diverse skill set in web development technologies. I specialize in server-side technologies such as Node.js, Express.js and have expertise in front-end frameworks like Vue.js and React.js. My proficiency in managing states using Redux.js ensures the development of efficient and scalable applications.

In addition to my JavaScript expertise, I am well-versed in version control using Git, enabling effective collaboration within the team. I use Sass and Tailwind CSS for styling and design implementation, creating visually appealing and user-friendly interfaces.

Over the course of my career at Ecologix, I have worked with databases such as MongoDB and Oracle, gaining valuable knowledge in database management and seamless data interactions.

As a Lead Senior Software Engineer, I have demonstrated effective leadership and collaboration skills, overseeing projects and contributing to their successful execution. My passion for innovation drives me to explore emerging trends and technologies in the web development industry.

In the future, I am committed to continuing my growth as a Lead Senior Software Engineer, using my expertise to contribute to impactful projects and lead teams towards building robust and cutting-edge web applications at the forefront of technology.

## TechShield

### Web Developer

January 2017 - January 2018 (1 year 1 month)

Lahore, Pakistan

With 1 year of experience in Laravel, I have developed proficiency in this PHP-based web application framework. Laravel is known for its elegant syntax, robust features, and developer-friendly environment. Over the course of my experience, I have honed my skills in building web applications efficiently and effectively using Laravel's powerful capabilities.

During this time, I have likely worked on various projects that involve database management, handling HTTP requests and responses, implementing authentication and authorization systems, and creating dynamic and interactive user interfaces. Laravel's MVC architecture has allowed me to maintain clean and organized code, making the development process more manageable.

---

## Education

### University of Sargodha

Bachelor of Science - BS, Information Technology · (March 2014 - March 2018)
